

Color Snap® Rail System

Color Snap® installs in a snap and provides an easy way to add color to your SSMR (Standing Seam Metal Roof). Utilizing any of AceClamp's® fully-assembled clamps, this modern design snow rail presents two "snap-in" features that can significantly reduce installation time and labor costs. Not only does the rail snap in place, but the Ice Clip is the first of its kind on the market that is a snap-fit as well. No screws are needed to hold this Ice Clip securely.

- Unique patented design offers uncompromising strength
- Commercial & residential application
- High lateral resistance
- Bar is available in 8' & 10' lengths
- Ice clips have two *snap-in* locations on rail and come in 2", 2.6" and 3.37" lengths
- Assembly includes necessary Rail and Connector. Clamp with Top Block and Ice Clip are sold separately.
- **Installs in half the time of competitive products***
