

WORKS GREAT UNDER PRESSURE

A2[®]

Patent# 9,850,661 B2

■ AVAILABLE FOR 1, 2 & 3
RAIL CONFIGURATIONS

FAST INSTALLING METAL ROOF SNOW BARS

AceClamp[®] Metal Roof Snow Bars feature our unique non-penetrating sliding pin clamp. Available in a variety of variants to cover most roofing seams, AceClamp[®] Snow Guards eliminate the need for set-screws, instead opting for our own unique non-rotating sliding pin clamp. The sliding pin action positively secures the snow retention system to the metal roof seam without penetrating, helping to protect the roofing finish and from installation damage and preserve the warranty.

Assemblies and clamps ship fully-assembled. Simply secure the bracket, slide-in your bars, secure the end clamps and you're done. Nobody gets you on and off the roof faster than AceClamp[®]. *(shown below with and without powder coating. Powder coating is additional)*
